

Adithya Suresh

Dallas, TX — ✉ adithyasuresh470@gmail.com — (940) 594-9081 —  LinkedIn —  GitHub —  Portfolio

Professional Summary

Software Engineer with **4+ years of experience** building enterprise-grade distributed systems, RESTful APIs, and AI-powered applications. At Ernst & Young, designed and owned production backend services, automated cloud data pipelines, and mentored junior engineers. Hands-on experience with **Python and Java AI workloads** — multi-layer RAG pipelines integrating **FAISS, GraphRAG, and LLM orchestration**. Pursuing M.S. in Information Science (GPA 3.92), University of North Texas.

Education

University of North Texas	Aug 2024 – May 2026
M.S. in Information Science	CGPA: 3.92/4.0
Jeppiaar Engineering College - Anna University	Aug 2016 – May 2020
B.E. in Electronics & Communication Engineering	

Technical Skills

Languages:	Java, Python, Go, JavaScript/TypeScript, C++, SQL
AI & Data:	LLM Integration, RAG, FAISS, LangChain, GraphRAG, spaCy, Apache Kafka, Apache Airflow
Backend & APIs:	Spring Boot, Node.js, RESTful APIs, Microservices, Redis, PostgreSQL, MongoDB
Cloud & DevOps:	AWS (Lambda, S3, RDS, SQS), Azure (AZ-900), Docker, Kubernetes, CI/CD, Git, Jenkins
Tools & Security:	Postman, Splunk, Jira, ServiceNow, API Security, Data Privacy Principles

Experience

Ernst & Young	Oct 2022 – Jul 2024
---------------	---------------------

Software Engineer

- Reduced backend API latency by **25%** by optimizing service-to-service integrations across distributed microservices and integrating **Redis caching** to reduce database load
- Automated cloud-based data pipelines using **GOSU, SQL, AWS, and ServiceNow workflows**, reducing manual operations by **40%** and improving operational efficiency
- Standardized exception handling and implemented **fault-tolerant recovery patterns**, accelerating resolution of **10+ weekly production incidents**; enhanced observability via centralized logging (Splunk), resolving **20+ database failures**
- Built scalable REST APIs with **Redis caching** and led **blue-green deployments** to minimize downtime across enterprise production environments
- Drove **enterprise platform upgrade (v8 to v10)**, diagnosing and resolving **DBCC database consistency failures** that blocked migration, ensuring zero data loss across production environments
- Engineered an **AI-powered FNOL POC** integrating **OpenAI speech-to-text** to transcribe customer voice reports into structured JSON, enabling real-time claims intake reference within the production system

Ernst & Young	Apr 2020 – Oct 2022
---------------	---------------------

Associate Software Engineer

- Resolved **100+ high-severity production defects** across Java backend services; enhanced billing and claims workflows via API improvements, increasing data accuracy by **15%** and reducing failures by **20%**
- Coordinated multi-environment **CI/CD releases** using **Git, Jenkins, and Postman** in Agile teams, supporting stable production deployments

AI & Innovation Projects

Geopolitical Risk Intelligence Agent — Lead Engineer	2026
--	------

- Architected a **real-time multi-agent AI system** ingesting live news via **Apache Kafka**, enriching articles with **spaCy NLP** (entity extraction, risk classification), and storing results in **PostgreSQL** across a fully containerised **Docker** infrastructure
- Built a **3-layer RAG pipeline** — OpenAI embeddings in **FAISS**, semantic retrieval, and **GPT-4o-mini** brief generation — orchestrated by a **LangChain multi-agent system** (MonitorAgent, CountryAgent, ReportAgent) producing structured executive intelligence reports
- Delivered a **Streamlit dashboard** with live risk feed, country risk map, and on-demand agent query interface processing **143+ real-time articles** across **5 risk categories**

Healthcare AI Assistant — Lead Engineer	2025
---	------

- Architected a multi-layer **RAG pipeline** combining **Dual-Vector Retrieval, GraphRAG, Hybrid Routing, and FAISS-based semantic search** over a **47K+ medical QA dataset**
- Achieved **4.1/5 response correctness** across **400+ evaluated queries**; applied **secure AI principles** including output validation, data access scoping, and auditability design

Certifications

Azure AZ-900 (Microsoft) — Splunk Fundamentals — Guidewire Associate & Specialist
